

# Vopasac HDPE

Films and tubes dedicated to the industrial bags sector, where the films can be sliced or perforated and the minimum production thickness is 6 microns up to 100 microns. These are the ideal solution for ensuring excellent moisture barrier properties. Our Vopa-Green High-Density Polyethylene (HDPE) products are also used in the automotive sector as protectors for painting operations, also excellent for their use as generic packaging for protecting furniture or other goods.

## Features

### Band

130 mm-2000 mm

### Thickness

5 µm-100 µm

### Recycle
